Emergency Medication

Always remember to take the following:

⇒ Medication lock box

If you have medications or supplies that need refrigeration, have a freezer pack and cooler available.

⇒ Prescriptions orders

⇒ MARS

⇒ First- Aid Kits and certification card

⇒ Certificate of custody

⇒ Medicaid and social security card

⇒ Change of clothes

If a disaster does happen, check your medications afterward. Moisture, light, and excessive temperatures can damage medication. Be sure your medications are okay to use. Contact your pharmacist if you are not sure whether your medication is still good.

If you missed doses of medication during a disaster, follow the instructions the pharmacy gives about missed doses. Contact a pharmacist or healthcare provider if you are not sure about what to do. Never just take additional doses to make up for those you've missed. Talk first with a healthcare provider.

Emergency Shelters

If you have pets in your home, contact the nearest shelter to ensure it is pet-friendly

If you need more additional information on shelter locations contact your county emergency management department.

ReadyNC.org

The Atlantic Hurricane Season runs from June 1 to November 30 with the peak season from mid-August to late October.

Before the hurricane:

- ⇒ Build an emergency kit
- ⇒ Make a family communications plan
- ⇒ Know you're the routes you need to leave your home (evacuation routes). Locate your local emergency shelters
- ⇒ Closely watch/listen to the weather reports. Listening every hour as the storm nears
- ⇒ Put fuel in all vehicles and withdraw some cash from the bank. Gas stations and ATMs may be closed after a hurricane
- ⇒ If authorities ask you to leave, do so quickly
- ⇒ If you leave (evacuate), be alert to flooded or washed-out roads. Just a few inches of water can float a car. Think: Turn Around, Don't Drown.
- ⇒ Keep a photo I.D. that shows your home address. You will need it when asking police if it is okay for you to re-enter your area or home.
- ⇒ Secure your property
- ⇒ using fans or opening doors and windows for airing. Deadly levels of carbon monoxide can quickly build up in these areas and can stay around for hours, even after the generator has shut off.

After the hurricane:

- ⇒ If you cannot return home and need shelter, text SHELTER + your ZIP code to 43362 (4FEMA) to find the nearest shelter in your area (example: shelter 12345).
- ⇒ **NEVER** use a generator inside homes, garages, crawlspaces, sheds, or other enclosed areas, even when using fans or opening doors and windows for airing. Deadly levels of carbon monoxide can quickly build up in these areas and can stay around for hours, even after the generator has shut off.

Categories :

Tropical Depression - contains winds up to 39 miles per hour (mph).
Tropical Storm - 39 - 73 mph winds
Category 1 - 74 to 95 mph winds
Category 2 - 96 to 110 mph winds
Category 3 - 111 to 129 mph winds
Category 4 - 130 to 156 mph winds.

Know the terms:

- ⇒ **Hurricane Watch** - hurricane conditions (sustained winds greater than 74 mph) are possible. Watches are usually issued 48 hours before the beginning of tropical-storm-force-winds.
- ⇒ **Hurricane Warning** - hurricane conditions (sustained winds greater than 74 mph) are expected. Warnings are usually issued 36 hours before the beginning of tropical-storm-force-winds.
- ⇒ **Tropical Storm Warning** - tropical storm conditions (sustained winds of 39 to 73 mph) are possible within 36 hours.
